

EDUCATION

B.Sc. in Computer Science and Engineering
Khulna University of Engineering & Technology (KUET) | Jan 2020 – Jun 2025.

SKILLS

- Programming Languages: C, C++, Python, Java.
- Web & Mobile Development: Bootstrap, Tailwind CSS, HTML, PHP, React.js, Next.js, Laravel, Flask, Android Studio.
- Databases & Tools: MySQL, Firebase, Oracle, PL/SQL, Git
- Data Science & Machine Learning: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib Trigger.dev.

EXPERIENCES

- Software Engineer I - Forward Deployment at **Markopolo AI** (October 2026 to Present)
- Lead Teacher **UpSkill Bangladesh** (AI Engineering) (Part-Time) (February 2026 to Present)
- Software Engineer I (Level 2) at **Ajentica (AI Engineer)** (Sept 2026 to Sept 2026)
- AI Engineer at **SOFOF Tech** (May 2026 to August 2026)
- Teaching Assistant at **Ostad** (AI Agent Development with n8n) (Part-Time) (August 2025 to April 2026)
- AI/ML Engineer – Computer Vision (Junior Level) at **Transforms AI** (April 2025 to September 2025)

PROJECTS

- **Leveraging Mask R-CNN for Enhanced Indoor Fire Detection with a Dual-Backbone Network (Thesis).**
- **Elinpows AI Chat Assistant** (Python, LangChain, LangGraph, Qdrant, HuggingFace, Gemini/Groq LLM) [[github link](#)]
 - Built an agentic RAG system over any codebase using LangGraph with tools for semantic search, file reading, and module summarization with source-cited answers.
 - Implemented AST-based Python parsing and batch vector uploads to Qdrant, with Gemini/Groq LLM tool-calling to autonomously decide retrieval actions.
 - Persisted multi-turn conversation history via a file-backed local storage layer, enabling context-aware follow-up queries across sessions.
- **Email Automation Using Trigger.dev** (Trigger.dev, OpenAI/Groq, Resend, TypeScript) [[github link](#)]
 - Built an AI-powered email automation system for personalized product-view and abandoned-cart campaigns using Trigger.dev workflows.
 - Integrated multi-LLM fallback, responsive email templates, and Resend for automated customer engagement.
- **AI Audience Generator** (Python, LangGraph, Groq, Qwen, Gradio, Trigger.dev) [[github link](#)]
 - Developed an AI-powered audience segmentation system with a 7-step pipeline for intelligent filtering and audience generation..
 - Re-developed the system using **Trigger.dev**, retaining core features while adding updated features and production-ready automation.
- **Social Media Automation** (n8n, Gemini, OpenRouter, HuggingFace FLUX, Gmail APIs)[[github link](#)]
 - Built an AI-powered social media automation system for research, content generation, and multi-platform publishing with approval workflows.
 - Automated personalized post creation and publishing across LinkedIn, Instagram, Twitter, Medium, Facebook, and Slack using n8n workflows and LLMs.
- **Portfolio** (React, Next-JS, Tailwind CSS) [[link](#)]
 - Developed a highly interactive portfolio website using React, Next.js, and Tailwind CSS to showcase skills and projects.
 - Integrated responsive design and smooth animations for an engaging user experience.

PROGRAMMING PROFILES

- Github: <https://github.com/Elin-powS>
- Portfolio: <https://swopnile-s-portfolio.vercel.app>
- Leetcode: https://leetcode.com/u/Elin_powS/
- Kaggle: <https://www.kaggle.com/acifulsopnil>

EXTRA CURRICULAR ACTIVITIES

- Senior Executive , Spectrum(KUET)
- Senior Executive, KUET Debating Society (KDS)
- Head of Management BitFest 2.0 (Datathon)
- Achieved 4th position in SynergyX2024 Datathon.
